

Tycron

Tycron is a line of high quality, non-rusting, quartz aggregate, shake-on hardeners that are available in an assortment of color choices for new concrete floors. In addition to specially processed quartz aggregates, Tycron includes cementitious binders, long proven water reducing agents and plasticizers, as well as other proprietary ingredients. Tycron will provide long term durability and low maintenance costs to industrial floors that are typically subjected to heavy traffic, impact, and high abrasion. Floors treated with Tycron stand up to years of punishment without dusting or disintegrating.

ADVANTAGES

- ✔ Quartz Aggregate
- ✔ Multiple Color Choices, Including Light Reflective or Natural
- ✔ Eliminates Dusting
- ✔ Provides Uniform Color to New Concrete
- ✔ Long Term Durability
- ✔ Lowers Maintenance Costs
- ✔ Enhanced Abrasion Resistance
