

KAUFMAN

Concrete Treatments

LEADING THE WAY IN CONCRETE TREATMENTS FOR OVER 50 YEARS!

HICAP & HICAP FT

Patch matching has never been easier! Our HiCap product line is specifically designed for pre-cast and pre-stressed concrete repair. HiCap contains no gypsum cements, and after achieving an initial set, it may be featheredged or shaved to any desired angle resulting in a flawless finish. Contact us today for a free sample.

HiCap — is a quick setting series of cementitious repair mortars that are easily carved and shaped to an exact angle. It's available in three shades of gray to match the surrounding concrete. HiCap products blend in flawlessly to produce an attractive repair.

What you need to know about HiCap:

- easily carved and shaved
- creamy consistency
- reduced shrinkage
- quick setting
- high strengths
- state approved
- three set times of 5, 15 and 30 minutes
- light, medium and dark gray options to match the concrete

HiCap FT — a quick setting, cementitious repair mortar that may be shaved or carved to match an exact angle. It's ideal for use in overhead and vertical applications from 1/2" down to featheredge. HiCap FT is resistant to deicing chemicals, the effects of freeze-thaw cycling, and features reduced shrinkage and high strengths.

What you need to know about HiCap FT:

- carvable and shaveable
- creamy consistency
- resistant to deicing chemicals
- reduced shrinkage
- resistant to freeze-thaw cycling
- NTPEP tested
- quick setting
- high strengths
