Re: LEED Systems – Thinfilm 420 with and without dye

In regard to LEED systems, Thinfilm 420 with and without dye, as manufactured by Kaufman Products, is eligible for the following credits:

MR Credit 5.1: Regional Materials: 10% Extracted, Processed & Manufactured Regionally
MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally

The intent of the Materials & Resources Credits 5.1 and 5.2 are to increase demand for building materials and products that are extracted and manufactured within the region, thereby supporting the use of indigenous resources and reducing the environmental impact from transportation. Kaufman Products is based in Baltimore, MD, where all materials are manufactured. If materials shipped to jobsites or to our distributor's warehouses are within 500 miles of Baltimore, Maryland this credit would apply.

IEQ Credit 4.2: Low Emitting Materials, Paint & Coatings

The intent of the Indoor Environmental Quality (IEQ) credit 4.2 for Low Emitting Materials –Paint & Coatings is to reduce the amount of indoor air contaminants that are odorous, irritating, and/or harmful to the comfort and well being of installers and building occupants.

I hope that I have answered your questions, however you have further concerns please do not hesitate to contact me at anytime.

Sincerely yours,
KAUFMAN PRODUCTS, INC.
