Silicure Concentrate

Health Product Declaration v2.3
CLASSIFICATION: 03 30 00 Cast-in-Place Concrete
HPD UNIQUE IDENTIFIER: 103702584320

Product Description

Silicure Concentrate, is a concentrated curing, sealing, and hardening compound that dustproofs and hardens existing concrete, and provides proper curing of new, hard-troweled concrete. When used on freshly placed burnished or hard-troweled concrete, Silicure Concentrate meets the moisture retention requirements of ASTM C-309, without leaving a membrane that inhibits applications of floor covering systems. Silicure Concentrate promotes high quality concrete, by penetrating into the pores of the slab, to cure, harden, and dustproof the concrete.

INVENTORY AND SCREENING NOTES:

This HPD was produced using primary information from the manufacturer, including CAS numbers and SDS when needed. The manufacturer has made every effort to report the substances in this product to the listed threshold. This is a voluntary, self-reported effort. Any errors or omissions shall be considered a human error and therefore reported to the manufacturer. The manufacturer shall not be liable for omissions.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- *Basic Inventory method with Product-level threshold.*
- *Nested Material Inventory method with Product-level threshold*
- *Nested Material Inventory method with individual Material-level thresholds*

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.3, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-3-standard

ACCELERATOR %: **80.0000 - 94.0000**

PRODUCT THRESHOLD: **100 ppm** | RESIDUALS AND IMPURITIES EVALUATION COMPLETED: **Yes** | MATERIAL TYPE: **Other: Inorganic compound**

RESIDUALS AND IMPURITIES NOTES: Impurities listed above the threshold by Quartz or Pharos databases are noted in this HPD. Residuals and impurities are considered following the HPD Best Practice Guidance, 10.02.17, version 1 “The threshold applied to Residuals and Impurities (R/I) is the same as that applied to intentionally added substances, i.e., 100 ppm or 1000 ppm. Residuals and impurities below the declared Inventory Threshold do not need to be reported on the HPD.” This includes average data declared in the common product database or peer-reviewed scientific articles. For this product, no actual material has been tested. Therefore, residuals and impurities are for informational purposes only and are not a guarantee of presence in the actual building material. Pharos and PubChem (formerly TOXNET) are the main databases for researching potential residuals and impurities. Any R/I above the threshold shall be listed on the HPD; otherwise, if none are listed, then no residuals or impurities are common in that substance above the threshold.

OTHER MATERIAL NOTES: To protect confidentiality, percentages are shown in range.

CERTIFICATION AND COMPLIANCE NOTES: The VOC content = 0 grams/liter.

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

USES:
Silicure Concentrate is designed to be used as a curing agent, densifier, and hardener on freshly placed concrete that is to receive subsequent flooring materials. In addition, Silicure Concentrate may be used on aged concrete to reduce and/or eliminate dusting and provide an extended life to the concrete slab.

COMPLIANCES:
ASTM C-309, Type I, Class B (Moisture Retention Requirements on Hard Troweled Concrete)
USDA Compliant
VOC Content Regulations from LADCO, OTC, & the EPA

PACKAGING:
5 Gallon Pails
55-Gallon Drums

PRECAUTIONS:
Protect Silicure from freezing. If it does freeze, allow to thaw. Stir or agitate uniformly before using. Do not apply if the temperature is less than 40oF. Prevent Silicure from into contact with glass, brick, aluminum, painted surfaces, or other glazed surfaces. Not recommended over colored concrete surfaces.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- *a method for the assessment of exposure or risk associated with product handling or use,*
- *a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.*

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this

HPD and for compliance with the HPD standard noted.
